

# The Age of Information

**FACT v. FICTION**

# Welcome, Player 1.

The internet is a world unto itself.

Like any other world, it has its own rules and customs.

YOU MUST LEARN  
THESE RULES IN  
ORDER TO  
SURVIVE.

There are others  
like you;  
you are  
**SEEKERS** of  
the **TRUTH.**

There are also those NOT like you; they have been TRICKED by BIAS and have LOST SIGHT of their MISSION.

**BIAS** is prejudice for or against something or someone; it is **UNFAIRNESS**

YOU will come  
face-to-face with  
TROLLS and other  
internet monsters WHO  
DELIGHT in CHAOS and  
TERROR.

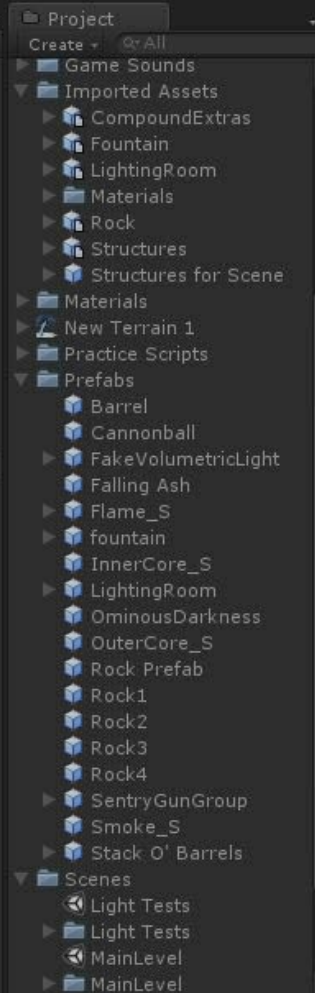

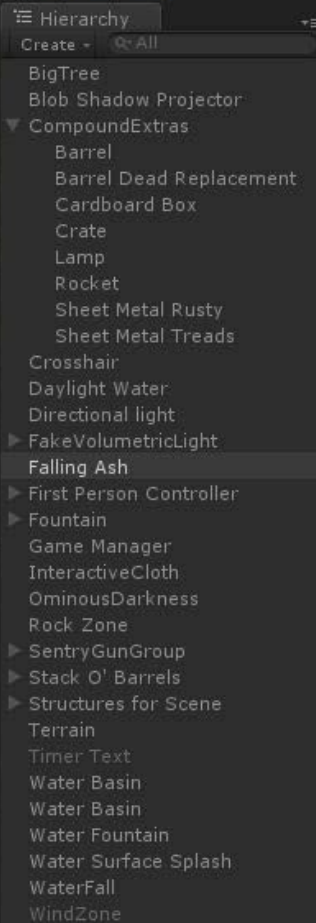

# RESIST!

THE FUTURE DEPENDS  
ON YOU!

**In order to  
prepare for  
your mission,  
you will need  
to complete  
training.**

.gov = government  
.mil = military

A character in a desert landscape, wearing a yellow and black suit, is running towards a large, black, mechanical structure. The structure has a long, cylindrical body and a large, pointed, metallic head with two glowing red eyes. The background features a large, dark pyramid with a glowing red light at its base, set against a cloudy sky. The ground is sandy and rocky.

MISSION: FIND THE  
TARGETS!

# To Evaluate:

- Web address has **.org**, **.edu**, **.gov** or **.mil**
- Name of site or agency is clearly marked
- Published or revised recently
- At bottom of screen, agency is listed again
- At bottom of screen, contact information is clearly listed

- DOENews@hq.doe.gov

Marrakesh – Mission Innovation countries came together today here at the UN climate change conference, otherwise known as COP22, to report on developments one year on from its launch. Finland and the Netherlands were welcomed as the most recent members to join this global effort to double clean energy R&D. In addition, a number of innovation challenges were launched to target development of energy technologies that will accelerate the clean energy transition.

Finland and the Netherlands joined Mission Innovation, increasing the total member country count to 23, including the European Union. The member governments represent more than 80 percent of global clean energy investment, and have pledged to double their clean energy research and development funding over five years to around \$30 billion (USD) per year in 2021. This commitment to clean energy R&D will help drive steep cost reductions in clean energy, expand job creation for member countries, and deliver breakthrough technologies that will allow for increased global ambition to reduce carbon emissions that keep temperature rise below the dangerous level of 2 degrees Celsius.

SCIENCE

# Climate Change Will Bring Wetter Storms in U.S., Study Says

By TATIANA SCHLOSSBERG | DEC. 6, 2016

## RELATED COVERAGE

Scientists See Push From Climate Change in Louisiana Flooding SEPT. 7, 2016

Looking, Quickly, for the Fingerprints of Climate Change AUG. 1, 2016

Decades of research (and perhaps your own recent experiences on hot, humid days) have suggested that [climate change](#) will lead to an increase in big storms that cause flash floods, landslides and other natural disasters. Now, [a new study](#) shows that such intense precipitation will most likely increase across the continental United States, but with important regional variations.

The study by scientists from the National Center for Atmospheric Research in Boulder, Colo., published on Monday in [Nature Climate Change](#), found that across the country, rainstorms may become more frequent and intense if greenhouse gas emissions remain at current levels. The biggest increase would be in the Northeast and the Gulf Coast.

In fact, the study shows that these intense storms could become five times as frequent. And when they do happen, there could be up to 70 percent more rain, potentially turning a heavy but not catastrophic storm into something closer to a biblical flood.
